INTRODUCTION AND OUR AIM

Anmol Piling & Steel Structures LLC

INTRODUCTION

Anmol Piling & Steel Structural LLC is a business established in Dubai, United Arab Emirates. Our quality of work & expertise has allowed us to become one of the best in the business & we are continually upgrading our services to meet the increasing demands of the clients. The customers' needs are of paramount importance and many schemes are tailored to meet specific individual requirements while still providing value engineered solutions.

We are piling specialists who have the innovation, equipment & technical expertise necessary to undertake the many changing foundation, piling and heavy shoring projects of our region. Many of the systems and techniques used by the company are backed up by years of experience in this field. And with the team of men who also have the experience and knowledge needed to the best job possible.

Meanwhile, the Group continues to challenge itself constantly to strive for an even better performance for its clients.

For Anmol Piling & Steel Structural LLC.

Anmol Piling & Steel Structures LLC

OUR AIM

- ❖ To provide services that will address and satisfy our customers' needs, requirements & expectations in a cost effective way.
- ❖ Completion of the projects to customer's in time on budget and to their satisfaction.
- ❖ To be known as a reliable, efficient and service minded company.
- ❖ To employ, the best industry practice and strive for excellence through total continuous improvement and innovation.
- ❖ To minimize the impact on environment and provide value engineering for our customers.

For Anmol Piling & Steel Structural L.L.C.

Anmol Piling & Steel Structures LLC

SCOPE OF SERVICES

Anmol Piling & Steel Structural LLC. is specialist in geotechnical and in pile foundation works which provides the following list of services in pile foundation, retaining walls and structural support members for retaining walls.

PILE FOUNDATION:

I. Bored and Cast-In-Place Piles

Installation of Bored and Cast-In-Place Piles

1. Using Bentonite or Polymer
2. Using Temporary Casing
3. Using Contiguous Flight Augers

II. Micro Piles

III. Caisson Piles

IV. Underpinning Piles

RETAINING WALL:

I. Contiguous Pile Wall

II. Secant Pile Wall

III. Soldier Pile Wall

IV. Sheet Pile Wall

V. Diaphragm Wall

MARINE PILING AND SHORING

I. Marine Piles

II. Sheet Piling works

STRUCTURAL SUPPORT MEMBERS FOR RETAINING WALL:

I. Ground Anchors

Types of Ground Anchors

1. Tie Back Anchors
2. Dead Man Anchors

II. Propped

III. Berms

RETAINING WALLS

GENERAL:

An embedded retaining wall is either temporary or permanent structure to take up support in an adjacent ground and support the soil from any collapsing and ground movement arising from the effects of excavation in front of embedded retaining wall (where the wall is use to basement and foundation structure). The wall may also be supported by structural members such as ground anchors, props and berms.

TYPES OF EMBEDDED RETAINING WALL:

- I. Contiguous Pile Wall
- II. Secant Pile Wall
- III. Soldier Pile Wall
- IV. Sheet Pile Wall
- V. Diaphragm Wall

CONSTRUCTION OF THE RETAINING WALL:

- a. Driven Piles
- b. Bored Pile Walls
- c. Diaphragm Walls

Anmol Piling & Steel Structures LLC

FEATURES:

CONTIGUOUS PILE WALL

- ❖ Comprises a series of bored cast-in-place piles with gaps between piles.
- ❖ Construction of walls is by means of CFA or a traditional bored piling rigs with temporary casing as required.
- ❖ Cheapest form of concrete piled wall.

SECANT PILE WALL

- ❖ Acts as water retaining walls.
- ❖ Comprises a overlapping of piles.
- ❖ The primary (female) piles are cast first and un-reinforced while the secondary (male) piles are subsequently installed to intersect the primary piles.

SOLDIER PILE WALL

- ❖ Comprises a series of vertical steel beam installed into the ground at intervals, which support a retaining wall made up of horizontal laggings.
- ❖ The horizontal laggings may consist of concrete, steel or timber.
- ❖ Can be installed either driven into place or placed in bored cast-in-place piles at centers typically 1 meter and 3 meters.

SHEET PILE WALL

- ❖ A row of interlocking vertical pile segments driven to form an essentially straight wall.
- ❖ Suitable as water retaining walls.
- ❖ Can be installed either driven into place or placed in bored cast-in-place piles

DIAPHRAGM WALL

- ❖ Panels will normally be kept full of drilling support fluid to prevent collapse of trench side.
- ❖ Excavation is carried out by grab, using chisels to break up obstruction, or by reverse circulation mills to cut through harder materials.
- ❖ A permanent water retaining wall
